DeepOceanTM - the Active Noise Cancellation Technology that made Lexsus 1010 ProNC into the most popular high-end USB headset from Accutone®, has been upgraded to version 2.0. Equipped inside the strongest, and most durable headset - the WB610MKII, is powerful both inside and out. Capable of doubling its ability to reduce background noises compared to version 1.0, maxed out at 30dB. Even in the noisiest call center, or outdoor environments, the newest ProNC-610MKII only picks up the user’s voice signals, delivering the clearest, cleanest audio transmission demanded by true professionals.

On top of superb microphone performance, it comes with dual 40mm voice-centric loudspeakers, designed for superb binaural audio output. Besides top-level acoustics, the WB610MKII headset is famous for its hexagon-shape structure, built for strength and long-lasting durability. It comes with premium-grade leatherette ear-cushions. This headset is extremely comfortable, designed for extensive use in the toughest environments.
